

Short description of your activity :

- CRPV is a SME cooperative. Its 70 members are mostly producers organisations involved on fruit & vegetable, viticulture, arable crops, covering about 65% of Emilia Romagna regional agricultural production.
- CRPV provides development of research and services supply for crop production (Extension service).
- CRPV implements applied research, demonstration activities and experimental trials.
- Beneficiaries of results are producers and stakeholders of the agro-food sector.

Scientific and technical topics you work on:

- sustainable crop protection (Integrated and Organic production);
- genetic improvement and patents (Plant Breeders' Rights) management;
- integrated production guidelines updating (including nutrition, irrigation, soil management, cultural practices, etc.);
- application of modern ICT tools in agriculture including precision farming;
- supporting chain producers in quality and traceability certification process;
- dissemination of research results and technologies transfer.
